## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claim 26 is withdrawn in view of the newly discovered reference(s) to Capozzi et al. 4,978,336. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 25,30-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Capozzi et al. 4,978,336.

Capozzi et al. disclose a dispensing device for fluid substances as seen in Figure 1, which comprises a receiving element (14) to receive fluid substances, having at least two containers (24,26) which are fixedly connected to each other and have adjacent outlet orifices on an end face thereof, a pressure-producing means (28) for ejecting the fluid substances through the outlet orifices, and a mixing nozzle (18) which is connected to the receiving element by means of a mixing nozzle holder (60,62) and connected to the outlet orifices in a fluid-conducting manner, the mixing nozzle holder comprising a releasable latch closure (64,66) attached to the receiving element wherein the latch closure is formed as one piece with the receiving element as seen in Figure 2.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 27,33,36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Capozzi et al. 4,978,336.

Capozzi et al. have taught all the features of the claimed invention except that the two arms being elastically deformable spring.

It would have been obvious to one of ordinary skill in the art to the two arms of Capozzi et al. to be of elastically deformable spring, in order to provide a greater means of grasping the attachment for the mixing nozzle.

***Allowable Subject Matter***

6. Claims 28-29,34-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pearson et al. 4,974,756, Drake 4,538,920 and Hoffmann 4,871,090 disclose other types of dispensing device.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick C. Nicolas whose telephone number is (571)-
